

AWAAIT showcases its pioneering real-time fare evasion control system DETECTOR at InnoTrans in Berlin

The start-up will present its system at the International Trade Fair for Transport Technology within Axis Communications' booth

Barcelona, July 25th, 2018 – Barcelona-based software company AWAAIT will attend the International Trade Fair for Transport Technology [InnoTrans](#), taking place in Berlin from the 18th to the 21st of September. AWAAIT will be present at Hall 2.1, booth 407, together with other [Axis Communications'](#) solution partners.

AWAAIT will showcase its pioneering system [DETECTOR](#), aimed at tackling fare evasion in public transport in real-time. The aim is to increase company awareness and find new leads to broaden market.

About DETECTOR

[DETECTOR](#) is an automatic real-time video analytics system that aims to tackle fare evasion on public transport. Using Artificial Intelligence-Machine Learning algorithms, a camera above ticket barriers observes the ticket validation process and sends an alert to inspectors' smartphones when it detects fare-dodging.

This allows very selective controls to intercept offenders before they reach the platform, effectively helping to reduce fare evasion without bothering paying passengers and, therefore, not disrupting overall mobility.

About AWAAIT

[Awaait Artificial Intelligence S.L.](#) was founded in 2014 with the objective of providing innovative real-time solutions for in principle complex problems using artificial intelligence and mobile technology. AWAAIT is headquartered in Barcelona.

Awaait Artificial Intelligence, S.L.
